

NOW WE'RE SUCKING DIESEL

DON'T MISS THE CRAIC AT BELFAST **CUBO 2024**

Come and experience our legendary hospitality and learn how Belfast was ranked in the **Top 10 most sustainable destinations in the World**, achieving several 'green tourism' firsts including **Queen's University Belfast** becoming the first organisation on the island of Ireland to be given a **Green Meetings Gold Award**, and Visit Belfast's "Changing the Menu. For Good" initiative.

Experience the warm welcome of the Queen's team, our exceptional catering and enjoy

an exciting conference programme centred around sustainability, the student experience, engagement and wellbeing and maximising conference and business tourism including revenue from film and TV - just like the "Line of Duty". It will also include a case study and visit to "One Elmwood" the new Queen's state-of-the-art Student Centre which brings together student services with the Students' Union where everything is in one place to help nurture student engagement and support wellbeing.

The first night will include an open top bus tour of the city, a visit to the brand new Belfast campus of Ulster University and onto the legendary Cathedral Quarter for food and drink and some legendary craic in our most notable and historic pubs - Guinness and Irish traditional music can be enjoyed at most venues! The gala dinner and awards night will be hosted in our stunning historic campus.

CUBO plans to hold a One Island study tour before the conference, starting in Dublin and including several of the universities on the island of Ireland.

All this and much much more - you won't want to miss out on the craic.

SEE YOU IN 2024
